Juan Valdivia

DEVELOPER FRONT-END

About me

My professional experience in IT took off when I finished the course at the center, www.espai.es.

After completing the course, I earned a degree in Communications and Networks Technician, Computer Equipment Maintenance, and this was complemented by my studies at ITAcademy and my participation in the projects IT-Academy-BCN/ita-wiki-frontend and IT-Academy-BCN/ita-profiles, on which I worked for six months.

I followed the clean code practices and agile methodologies of most companies in the sector. I helped 13 developers, in which I contributed, introducing those who have been joining to the development process.

My professional experience in IT took off when I finished the course at the center, www.espai.es.
